

# Banking Transaction Data Analysis

## PDF version for viewing

This PDF is a readable version of the project information. The internship submission form requires the original file formats: .ipynb, .txt, .docx, .md and .csv. Therefore, this PDF should NOT replace those files.

## Required files

- HimaniZade\_BankingTransactionAnalysis.ipynb — Jupyter Notebook
- requirements.txt — Python dependencies
- HimaniZade\_BankingTransactionAnalysis\_ProjectReport.docx — Project Report
- README.md — Project overview and instructions
- bank\_transactions.csv — Synthetic dataset

## Project overview

This project analyzes a synthetic banking transaction dataset using Python, Pandas and Matplotlib. It covers transaction types, channels, account types, monthly trends and transaction status.

## Important

If your Android picker only shows photos or PDFs, choose Files, Documents, Browse, or a similar option to access the original project files.
